Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Response to Amendment

1. As per Applicant's instructions in Paper 8 as filed on 9/4/03, claim 9 has been amended and claims 17-19 have been newly added.

Response to Remarks

2. Applicant's remarks filed on 9/4/03 have been fully considered but they are not persuasive. The Applicants present an argument of which the Background does not disclose the recited claim limitation "...a macro event data creation unit which creates macro event data by structuring a plurality of event data generated by the event data creation unit based on definition contents of the macro event defined by the definition unit..." and the macro event data creation unit and the retrieval unit.

However, after careful scrutiny of the above references, the Examiner must respectively disagree, and maintain the grounds of rejection for the reasons that follow.

In response to the argument, the Background discloses a macro event data creation unit (Fig. 32) which creates macro event data by structuring a plurality of event data generated by the event data creation unit based on definition contents (employee no.) of the macro event defined by the definition unit. The Examiner considers the plurality of employee numbers as the definition content of the macro event, whereas the Applicant considers the number on the number plate as the definition content of the macro event. Nevertheless, given broad interpretation of the recited claim limitation, Fig. 32 and employee numbers meet the recited limitation.

Furthermore, the macro event data creation unit is clearly met by Fig. 31 and the retrieval unit is met by page 5, lines 19-21 (Background).

Art Unit: 2613

3. Newly submitted claims 17-19 directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: Independent claim 17 comprises a limitation “**modifying** macro event data within a macro event according to the event.” belonging to an another (second) embodiment.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 17-19 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-2, 7, 9-10, and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Applicant's admitted conventional prior art (substantially the same as JP 10240774) as was previously set forth in the last Office action as Paper 7.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2613

7. Claims 3-6, 8, 11-14, and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's admitted conventional prior art (substantially the same as JP 10240774) as was previously set forth in the last Office action as Paper 2.

Conclusion

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
